

NEW ERYPAL I PALLET CHARACTERISTICS

Specifications:

- Static Load : 10.000 kgs
- Dynamic Load : 2.000 kgs
- Racking Load : 1.250 kgs
- Weight : 25 kgs

One-piece mould design reinforced at shock points
Maximum UV protection (degree 8)
Outside storage between -40°C and +70°C
Constant weight and size tolerances lower than 2 mm
Resistant to shocks and to most chemicals
Hygienic : easily washable with water spray or steam
Industrial size pallet with closed top desk
Perimetric type reinforced at the 4 corners
Also available with 2 runners only
Very resistant to impact tests can be provided with rubbers for forklift
With or without rims *Ideal for the food industry
OK with HACCP standards

More advantageous than wooden pallets :

Higher static and dynamic resistance properties than wood
No humidity stored, therefore no putrefaction
No migration or contamination towards the transported material
